TEXAS AI DATA CENTER BOOM

Live Tracker Sheet — Grid, Water & Land-Use Snapshot

248+	519	1.6GW	$9.8bn
Data center projects planned statewide	Grid connection requests in two years	Meta's Texas compute deals	Hut 8 Texas campus lease

Stats pulled live from powergrabtx.com/right-now at build time.

TODAY'S FLASHPOINTS — OCT 21, 2026

Today's News

The letter answers the question we flagged yesterday, at least on paper: TCEQ says it is holding back final permits, not refusing to look at applications. It doesn't explain why stormwater coverage granted after Sept. 21 still reads "active." In unincorporated counties, that coverage can be enough to start moving dirt.

Read the full breakdown, with sources, at powergrabtx.com/briefings/morning-briefing-2026-10-21.

WANT THE NEXT GRID UPDATE IN YOUR INBOX?

Power Grab TX publishes a Morning Briefing every weekday tracking ERCOT, TCEQ, and local zoning fights across Texas. Subscribe free at powergrabtx.com/stay-informed.

Power Grab TX tracks the real cost of AI data centers in Texas — on the grid, the water table, and the communities in their shadow. This sheet is regenerated automatically at every site build from powergrabtx.com's own Right Now and Morning Briefing pages, and reflects public reporting current as of the date above. It is not a comprehensive map of every project. © Power Grab TX.
