

TEXAS AI DATA CENTER BOOM

Live Tracker Sheet — Grid, Water & Land-Use Snapshot

248+ Data center projects planned statewide	519 Grid connection requests in two years	1.6GW Meta's Texas compute deals	\$9.8bn Hut 8 Texas campus lease
---	---	--	--

Stats pulled live from powergrabtx.com/right-now at build time.

TODAY'S FLASHPOINTS — AUG 13, 2026

1. ERCOT & Grid Signals

A paperwork pause that started Aug. 3 has become the biggest flashpoint in Texas energy politics, with the White House now publicly needing the governor over it.

2. Data Center Construction & Corporate Activity

Amazon's Pecos County build is now the clearest example of the land rush and the corporate-compliance push happening at the same time, in the same county.

3. Environmental & Air-Permit Activity (TCEQ)

TCEQ's own permit categories are becoming part of the story — "standard permits" let gas plants serving data centers skip the public input that larger air permits require.

4. Land-Use & Zoning Developments

The Keller-Westlake dispute shows the zoning fight moving past single-city moratoriums into neighboring cities threatening legal action over projects just across their shared border.

5. Power-First Strategies & On-Site Generation

Amazon's Pecos County gas plant is shaping up as the test case for how far "power-first," build-your-own-generation strategies can go before drawing national environmental scrutiny.

Read the full breakdown, with sources, at powergrabtx.com/briefings/morning-briefing-2026-08-13.

WANT THE NEXT GRID UPDATE IN YOUR INBOX?

Power Grab TX publishes a Morning Briefing every weekday tracking ERCOT, TCEQ, and local zoning fights across Texas. Subscribe free at powergrabtx.com/stay-informed.

Power Grab TX tracks the real cost of AI data centers in Texas — on the grid, the water table, and the communities in their shadow. This sheet is regenerated automatically at every site build from powergrabtx.com's own Right Now and Morning Briefing pages, and reflects public reporting current as of the date above. It is not a comprehensive map of every project. © Power Grab TX.
